

Ofir Moyal – QA Engineer

+972-50-9092926 | ofirmoyal1@gmail.com | Mazkeret Batya (Rehovot)

Professional Summary

- ✓ QA Engineer with 6.5 years of experience in Mobile & Web testing in an Agile environment
- ✓ Experience developing automation infrastructure and scripts in Java/Python (Selenium)

Work Experience

2025 | QA Engineer (90% Manual, 10% Automation) | accessiBe

- Requirements analysis and WCAG rules review; creation of test documents (STD, STP) and test execution using Qase.
- Execution of: functional, integration, regression, performance, E2E, and post-production tests for a complex Web product.
- Accessibility testing including keyboard navigation, ARIA attributes, and validation within the DOM.
- Database validation and data synchronization between Dashboard, Widget, and CDN.
- API testing using Postman.
- Development and maintenance of automation tests using Playwright and TypeScript (Atomic and E2E tests).
- Debugging using DevTools: accessibility tree and ARIA/state analysis in the DOM, widget loading and configuration validation including request statuses and server-client synchronization, performance and accessibility issue analysis including load times, investigation of JavaScript errors, library conflicts.
- Ongoing collaboration with development teams in an Agile environment, including bug creation, tracking, and lifecycle management in Jira.
- Regression testing and Pull Request approval as part of the CI/CD process using CircleCI.

2020–2025 | QA Engineer (85% Manual, 15% Automation) | Mediaforce

- Analysis of specification documents (User Stories) and execution of static testing.
- Creation of test documentation (STD, STP) and execution of tests in Web and Mobile environments.
- Execution of functional (C/S), integration, compatibility, GUI, usability, exploratory, negative, and E2E testing, including database validation.
- API testing using Swagger and development of automation infrastructure using Selenium and Java.
- Bug investigation using DevTools and bug tracking and documentation in Jira within an Agile environment.

2019–2020 | Junior QA Engineer | MyCheck

- Writing test cases and performing billing tests for Web and Mobile applications (Android, iOS).
- API testing for microservices using Postman and writing SQL queries at JOIN level.
- Development of automation scripts using Selenium and Python.
- Bug investigation and documentation using Jira.
